🎲 🎲 🎲 Roll It 13 🎲 🎲 🎲

Do you want to read the instructions? (If so type yes or if not type no)Yes

*** Instructions ***

To begin, you decide on a score goal (e.g The first to get 50 points (or higher))

For each round of the games you roll a dice to decide how many points you get

The winner of the round is the person who is the closest to 13 (must not be higher)

If you win the round then your score will increase by the number you got,

If you were to roll a double on your first roll (e.g. 2 6s)

then you gain DOUBLE the amount of points (12 x 2 = 24)

If you lose the round you gain 0 points

If there is a tie then both players get the same number of points added

For example - You roll 11 and the Computer rolls 11, this means you both gain 11 points

Your goal is to get the target score (or higher) first before the Computer does

Enter a target score: 50

*** Round: 1 ***

User managed to get 4 and 4. Total Points: 8

User is eligible to win double the points if you win this round since you got a pair! 🙌 🙌

Computer managed to get 4 and 2. Total Points: 6

Press <enter> to roll again or type any letter to pass (reminder: if you pass then you won't roll again)
